IPG Photonics' line of 878.6 nm fiber-coupled diode lasers provides a complete pumping solution for Vanadate-based solid-state lasers. IPG's wavelength-stabilized diodes are differentiated by an unmatched level of spectral purity and stability. We offer an ideal combination of power, reliability and form factor with solutions ranging from 30 Watts to 150 Watts maximum fiber-coupled output power.

At IPG, we manufacture to rigorous telecom-grade standards in the world's largest high power diode fab. Each wafer is individually qualified, which sets IPG apart from alternative industrial pump products using short-lived diode bars and bar-stack technologies. IPG's line of 878.6 nm fiber-coupled diode lasers becomes the new de-facto standard for Vanadate-based solid-state laser pumping.
